IGB ART OF SCIENCE

Showcasing imagery from the Core Facilities at the Institute for Genomic Biology at the University of Illinois, the Art of Science traveling art exhibit highlights cutting-edge research that is addressing significant problems in the environment, medicine, energy use and production, and fundamental research.

The Art of Science exhibit is located in Terminal 3, past security, near the Concourse G Rotunda and on the bridge connecting Terminal 3 with Terminal 2.

* Images from the Art of Science are also on display at Illinois' Midway and Willard airports.
